GOAL-ORIENTED FINANCIAL MANAGEMENT

Fast Forward

Three Core Financial Challenges

01

No Financial Visibility

- Users see transactions, not insights.
- They don't know where their money goes or why balances drop so fast.

02

No Predictive or Preventive Guidance

- No alerts before running out of funds.
- No early warnings or recommendations to adjust spending.
- Leads to mid-month anxiety and reliance on short-term loans.

03

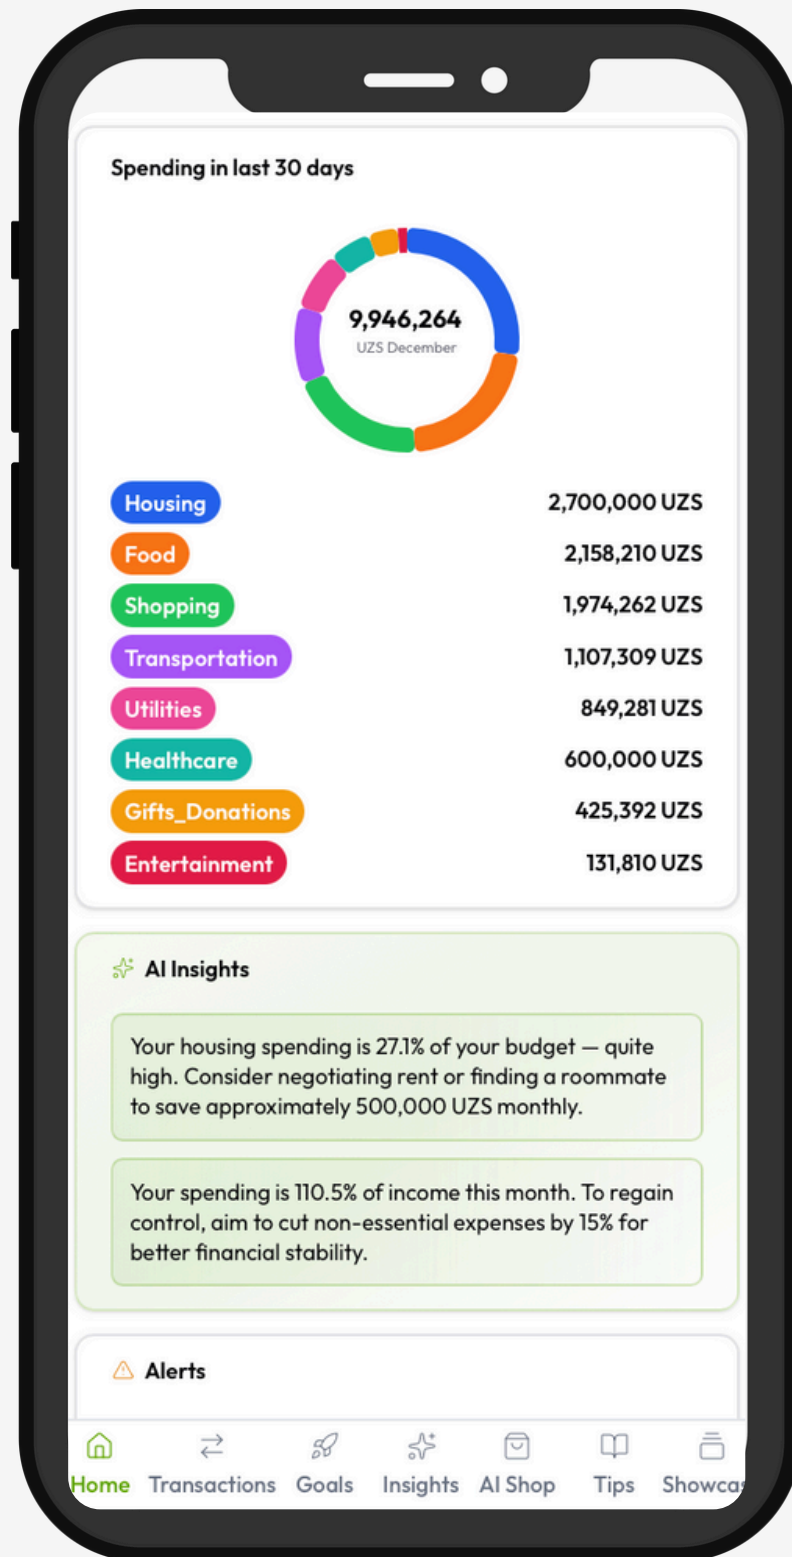

No Personalized Planning or Goal Support

- Users can't plan savings or long-term goals effectively.
- No realistic forecasting for future milestones (e.g., vacations, big purchases).
